- ☐ Cover all pillows and computers, put away toiletries, towels and clothing
- ☐ Put away all toothbrushes, face cloths, cosmetics and toilet rolls
- ☐ Cover kettle, toasters, coffee machines, fruit, cutlery and cooking utensils
- ☐ Cover TV monitor, remote, telephones and fish tanks

POST TREATMENT CHECK LIST

Your serviceman is trained and qualified to treat your particular pest problem using the correct products safely and effectively. Because insecticides must be used at safe and economical levels you may find that although you will see results immediately, it may be as much as 14 days before you are completely free of pests. However do not be concerned as these pests will be killed by the residual action of the chemicals.

For this reason it is important that you follow these instructions when you return:

1. On first arrival ventilate your home for 10 minutes
2. Sweep up all dead insects and wet wipe all horizontal surfaces
3. Wash all food preparation contact surfaces e.g. Bench tops
4. Remove and launder all covers from bedding, pillow cases and monitors
5. In the case of a flea treatment, refrain from vacuuming carpets for 5 days
6. If windows need cleaning, clean only the window panes and not the frames or window sills

If you have any concerns please contact Advanced Pest Control
